

# Nature's Fresh

Every pet owner's best friend

Let's face it, even a well-trained pet has accidents now and then, and pets can sometimes create pretty bad odors and stains. That's why Nature's Fresh is every pet owner's best friend.

Nature's Fresh is a mixture of six different plant derived enzymes suspended in water with a small amount of a surfactant agent to help evenly disperse the enzymes. An enzyme is a protein that catalyzes or accelerates biochemical reactions. The enzymes in Nature's Fresh can perform some pretty amazing biochemical reactions that remove stains and knock out odors.

The great thing about Nature's Fresh is that it doesn't just mask odors. It actually breaks down the odor-causing substances to remove them completely. And, it works on just about any organic stain or odor, including skunk odor.

But, that's not the only reason why Nature's Fresh is a great formula for any pet owner to keep handy. Nature's Fresh also has many valuable healing properties that make it a great remedy for a wide variety of pet (and human) health problems. Enzymes catalyze healing reactions, and sprayed on topically, Nature's Fresh can help injuries to heal faster. It can even relieve pain.

Here are just a few of the ways Nature's Fresh can be beneficial for the pet owner.

## Litter Boxes

Spray Nature's Fresh on the litter box to eliminate odors. Give the cat liquid chlorophyll in it's drinking water, as this will also help.

## Pet Odors

Spray Nature's Fresh on pet bedding, toys, couches or any other place where your pet has been, to leave a clean, fresh smell. You can even add a few drops of your favorite essential oils to a bottle of Nature's Fresh to make it an even better air freshener.

You can also spray Nature's Fresh directly on your pet's fur between baths to remove odors. It can also be used, along with Sunshine Concentrate, as a natural solution for giving your pet a bath.

## Bad Breath and Teeth Problems

Put a little Nature's Fresh on your finger and "brush" your pet's teeth with it. This helps prevent dental problems and promotes dental health. It also helps eliminate bad breath.

## Skunk Smell (or other Odors)

Spray the animal thoroughly with straight Nature's Fresh until the fur is slightly damp. Nature's Fresh has to come in contact with odor causing agents to break them down, so be sure to cover the affected area thoroughly.

## Removing Urine Stains and Smell

Nature's Fresh can be used for spot cleaning stains and odors, including urine stains in carpets and furniture. Simply spray it directly on the affected area and blot with a towel. For tougher problems, make a cleaning solution of 1/4 cup Nature's Fresh and one Tablespoon of Sunshine Concentrate to a gallon of cold water. Add 5-8 drops of your favorite essential oil and use it as a cleaning solution. This mixture can be used as a cleaning solution for carpets and upholstery.

## Digestive Upset

The enzymes in Nature's Fresh can aid digestive problems in people and animals. Add just a few drops of Nature's Fresh and some Liquid Chlorophyll to your pet's drinking water. This can also improve your pet's breath.

## Minor Injuries

Spray Nature's Fresh on bruises, swellings or other minor injuries to promote rapid healing. It can ease itching, swelling and discomfort from the bites of fleas, ticks, chiggers, mosquitoes, ants and so forth.

## Pain Relief

Applied topically by itself, or with Deep Relief essential oil blend added, Nature's Fresh can be very effective in relieving pain associated tension, injuries, arthritis, sprains and even broken bones. As a poultice it helps bruises, sprains, strains and broken bones heal faster especially mixed into a paste with PLS II or Bone/Skin Poultice.

These are just a few of the ways Nature's Fresh Enzyme Spray can be used by pet owners. Of course, Nature's Fresh has numerous other benefits for household and human use, too. Talk to the person who gave you this handout for more information.
